Chapter 1

A Unique Computerized Solution for Healthy Childbirth for Childless Couples Using 'Comprehensive Digital Medicine'

Abstract

After working for about a quarter century, GDV (Gas-Discharge-Visualization) device, alternatively called EPI (Electro-Photonic-Imaging) device, was innovatively developed by Prof. Konstantin. G. Korotkov in 1995. The sophisticated GDV diagnostic device additionally is being used as an important tool for generating Comprehensive Digital Medicine (CDM) by feeding an electromagnetic signal from the GDV device to the Comprehensive Digital Medicine preparation device, involving very low cost. This medicine helps to achieve near-zero disease-levels in the various organs as well as the Immune, Nervous and Endocrine systems of all health-conscious persons, who want to continue sincerely with the optimal combination of the preventive medicines of CDM and Evolved-Homeopathy, and occasional GDV (once in a few months) check-up. When this condition is achieved, about 20 years age-reduction is felt along with improvement of physical and mental stamina and increment in longevity. Healthy Childbirth for Childless Couples Using 'Comprehensive Digital Medicine': The problems faced by Childless Couples, are very disheartening in all countries of the world. Some spiritual leaders recommend childless couples attend a spiritual retreat at a good retreat center and understand the pitfalls and shortcomings in their life; some recommend to take good (conventional) medical treatment to conceive a child; but, they come across many cases where both husband and wife are perfectly Okay, but cannot bear a child. My Wellness Center (mywellnesspgh.com) states (18 Aug 2026) that open communication, finding a support network, and attending therapy regularly can help. e shots Egg retrieval Implantation. Involuntary childlessness is often an emotionally devastating ordeal, especially while the couple holds out hope to have their own children (instead of fostering a child or choosing adoption). Approximately 3.6 million babies are born in the US every year, according to the CDC — That is nearly 10,000 babies every single day! However, open communication, finding a support network, and attending therapy regularly can help. Sadly, the miracle of birth is a far-off fantasy for many couples around the country. No matter how hard they try to get pregnant, nothing seems to work. In view of both the above spiritual and non-spiritual methods, the Comprehensive Digital medicine (CDM) provides a more scientific and positive solution. Because, the GDV whole-body diagnostic device gives one disease-level number for each of the left and right Urino-Genital system of human body for each of husband and wife. Their CDM dose generated for each of them should be consumed by the concerned persons, and then one more set of tests should be conducted for each of them. If for both of them sufficient reduction of disease-level numbers take place, then they can go ahead for conception of a baby. When the disease-level numbers are high, nature prevents childbirth, so that stunted or inhibited childbirth, or miscarriage will not take place. To begin with, the global organizations and insurance companies will have to provide for the first few years, fund and offer suitable incentives (may be, appropriate annual cash-incentives after remaining under coverage of Comprehensive-Digital-medicine prevention scheme), since vast majority of the apparently healthy part of humankind believe that they're healthy, although all of their organs are having imperceptible disease level between 0.7 to 1.0, and such disease level in immune system (including Spleen) cannot prevent tumors/ cancer and many other severe diseases. After a span of few years, global GDP can increase by 5% over a year (in contrast with the present 3%), when this increased GDP (due to better health and increase in retirement age) can fund such schemes.

Keywords: GDV/ EPI Device, Digital medicine, Health promotion, Preventive medicine, Comprehensive digital medicine, Stress-Related Disorders, Evolved homeopathy, Childlessness.

Introduction

As explained in our previously published papers, Health promotion methodology of Comprehensive Digital Medicine is very useful to achieve near-zero disease-levels in various organs and Immune, Nervous and Endocrine systems of a person's body, but only for those persons, who are health-conscious and want to continue sincerely with the preventive medicine of methodology of Comprehensive Digital

Medicine, with occasional GDV check-up, as may be necessary [1, 2]. Normally, any typical healthy person will not start undergoing Health-promotion, because they usually consider themselves sick only after perceiving one or more symptom(s).

As explained below, true “Nipping in the bud” of any disease from a patient’s body is possible only when the treatment starts based not on a patient’s perception of symptom(s), but on a whole-body diagnostic chart generated by a sophisticated device like the GDV diagnostic system.

As explained in a previously published paper [2], persons whose disease level of immune system has not been brought down and maintained at near-zero values (as is done while doing Health-promotion using Comprehensive Digital Medicine) have partly-diseased immune system (including Spleen) [3]. Hence, cancer cells are able to hide from, or trick the immune system into helping cancer cells stay alive and grow [4]. Hence, to eliminate the possibility of diseases including the growth of tumor and cancer cells, concerned persons need to do Health-promotion using Comprehensive Digital Medicine, and periodical GDV check-up to ensure that their organs, as well as immune (including Spleen), Nervous, and Endocrine system are always remaining at near-zero values.

This paper presents ways to prevent and cure problems of various organs and systems using Health promotion methodology utilizing an optimal combination (as explained below) of the side-effect free preventive and curative medicines of Comprehensive Digital Medicine and Evolved homeopathy, which is very useful to achieve and maintain near zero disease-levels in the various organs and systems of all persons; but, they need to continue sincerely with the preventive medicines of Comprehensive Digital Medicine and Evolved homeopathy, and occasional GDV check-up (once in a few months); this will help them prevent occurrence of tumor and cancer, in their bodies.

As mentioned in a previously published paper [5], Evolved Homeopathy is based on three fundamental-principles of cure: (i) Prevention is better than cure, (ii) Nipping in the bud, and (iii) identification of the Exciting or Primary cause for acute diseases (Note- Aphorism 5, Organon of Medicine, Samuel Hahnemann), for achieving rapid cure and future Prevention.

In a previously published paper, it has been described how the preventive methodology of Evolved homeopathy can be used by any human being to maintain her /his heart, cardiovascular system and Coronary vessels, etc. at near zero disease-levels [6]. By following the three fundamental-principles of cure mentioned above, it is possible to prevent and even cure Angina in the initial stage; and, by then whatever little dead tissue forms in the myocardia and its associated muscles (which can be felt as a constricting or tightening pain, in the heart and nearby areas of chest, while bending the upper part of the body), those can be eliminated by using a Evolved Homeopathy medicine as and when required. Also, to avoid recurrence of further Angina attack, preventive medicines need to be taken as and when required, to eliminate the effect of any exciting or primary cause.

Materials and Methods

GDV whole-body diagnostic system

After working for a few decades, Prof. Korotkov of St. Petersburg National Research University of ITMO (Informational Technologies, Mechanics and Optics) in Russia, developed this low-cost (only a few thousand Euros, which will fall further when produced on a mass scale), sophisticated diagnostic device, utilizing the EPI (Electro-Photonic Imaging) technique or the Gas Discharge Visualization (GDV) technique, based on the Kirlian effect, in 1995. This device registers and analyzes the electro-photonic emissions of human fingers, by applying a weak electrical current to each of the fingertips for less than a millisecond; the electronic ”glow” of this discharge, is captured by the camera / scanner system and then analyzed based on concepts of acupuncture (developed over more than two centuries, in China, Japan, etc.) of TCM (Traditional Chinese Medicine) and utilization of advanced mathematical techniques. The resulting chart reports the health conditions of each of about thirty organs/glands/systems (including the Immune, Nervous and Endocrine systems) of human body, within a scale range of 0 to 3. Analysis of these data reveals that a person’s perception of symptom(s) usually starts at a disease level from 1 to 1.5, whereas the detection of diseased condition, by the corresponding diagnostic devices of allopathy (conventional medicine) usually starts at a disease level near 1.5 to 2.

The electro-photonic emissions of human fingers and the current flowing through the 12 Meridians are pathways through which life-energy, known as ”qi” (or chi), flows to connect different parts of the body, is really a natural healing system, provided by nature, to cure diseases of various organs. But, this system also gets tired or less effective due to aging and effect of stress/ strain etc. Hence, CDM is generated from potentization of this electro-photonic emissions of ten human fingers.

The GDV device is being used as an important tool for achieving near zero disease-levels in the various organs and systems of human body, which leads to Health promotion.

Comprehensive Digital Medicine is generated by feeding the feeding the electromagnetic signals for all ten fingers, from the GDV device to the Comprehensive Digital medicine preparation device, involving very low cost [1].

Evolved-Homeopathy and COVID-19 Era

The need for Evolved homeopathy (which is an evolved version of “Advanced-Homeopathy”, as explained below) has arisen during the COVID era, as it has been observed that many diseases are stress-related disorders, and this is true for more diseases and for larger section of patients (including even children and teenagers).

It has been found that potencies lower than those specified in Advanced-Homeopathy [7] (which can be called ‘Specific Homeopathy’) developed over a few generations by Dr. P. Banerji, et al, of Prasanta Banerji Homeopathic Research Foundation (PBHRF), Calcutta, are sometimes more useful to avoid medicinal aggravation based on the basic homeopathic principle: “Similia Similibus Curentur”.

Health promotion methodology presented here is an optimal combination (as explained below) of Comprehensive Digital Medicine and Evolved homeopathy medicines, which are very useful for any person to maintain a person’s organs as well as the Immune, Nervous and Endocrine systems at near zero disease-levels, based on the occasional checking (once a few months) using the GDV whole-body diagnostic system, when simultaneously the Comprehensive Digital Medicine for that person is generated, for subsequent consumption of that person.

Prevention is better than cure

This age-old fundamental-principle of cure is one of the foundations of Comprehensive Digital Medicine and Evolved homeopathy medicines.

The following six Evolved homeopathy medicines may be taken daily (once for persons having tension-ridden lifestyles, and twice for persons having excessive tension-ridden lifestyles) for prevention of Liver, Stomach, Lungs and Heart Problems, etc., as mentioned with References in our previously published papers and other sources [6, 7, 8, 9-17].

(i) Cactus Gr. 2x; (ii) Crataegus Oxy. 2x (a heart tonic); (iii) Cocculus Ind. 2x; (iv) Colocynthis 2x; and (v) Chelidonium Majus 2x; (vi) Ipecacuanha 2x.

It is important to mention that doses of these medicines should always be taken, keeping 20 minutes gap (from any consumption of food or drinks), before and after the medicine doses.

Nipping in the bud

Another age-old fundamental-principle of cure, "Nipping in the bud" belongs to the foundations of Comprehensive Digital Medicine and Evolved homeopathy medicines.

For most of the people, bimonthly generation of Comprehensive Digital medicine, and its regular consumption will be enough to keep all their organs and systems at near zero disease-levels.

But, for those who are having tension-ridden (particularly, anxiety, irritability and anger) lifestyles, the regular dosage of the few medicines mentioned in the previous section (2.3) will prevent by nipping in the bud, the ailments of Liver, Stomach, Lungs, heart, Coronary vessels, cardiovascular system, of concerned people, with a purpose to achieve and maintain near zero disease-level till the next bimonthly session of GDV Diagnostic check-up.

Results

Based on experience of the persons who are utilizing the optimal combination (as explained below) of side-effect free Comprehensive Digital Medicine and Evolved homeopathy medicines for preventing problems of various organs and systems to achieve near zero disease-levels, it is clear that the methodology of Comprehensive Digital medicine for Health promotion is very effective. It can also be felt that the effect of Comprehensive Digital medicine is quicker and good in improving the conditions of various organs as well as Immune, Endocrine and Nervous systems simultaneously, that are near even to the bud stage.

Case history 1

This case history relates to Figures 1 and 2, which are the Diagnostic charts of AB, who has undergone Health-promotion using Comprehensive Digital medicine for prevention and cure [1, 2], for one and a half decade regularly.

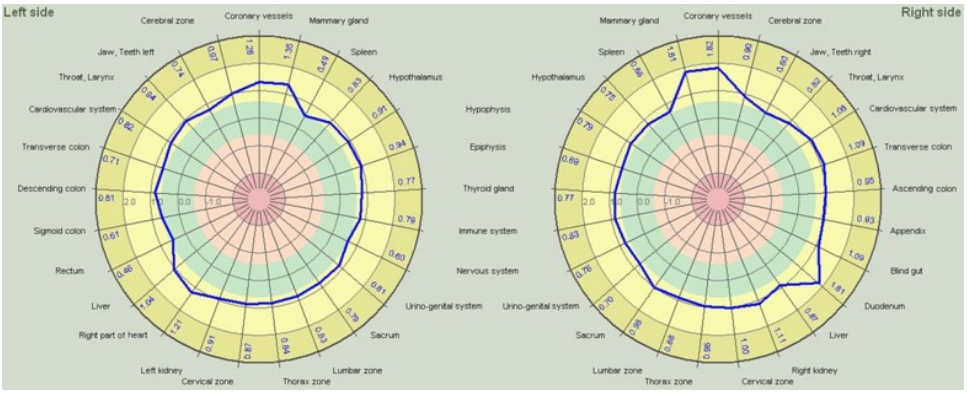

Figure 1: Initial Diagnostic chart of AB (a typical healthy person), before undergoing Health-promotion using CDM

From his experience, AB feels that there has been about 20 years age reduction along with improvement of physical and mental stamina, because of regularly using the optimal combination of side-effect free Comprehensive Digital medicine and Evolved homeopathy medicines, along with GDV check-up for a few years.

Healthy Childbirth for Childless Couples Using 'Comprehensive Digital Medicine'

The problems faced by Childless Couples, are very disheartening in all countries of the world.

The Spiritual Solution For Childless Couples, 27 Aug 2023 — by Justine Jacob, states [18] that he recommends childless couples attend a spiritual retreat at a good retreat centre and understand the pitfalls and shortcomings in their life. He further states that the following: The question put forward by all is," What is the solution to childlessness?" Humanly speaking the only solution would be to take good (conventional) medical treatment to conceive a child. But we come across many cases where both husband and wife are perfectly ok, but cannot bear a child. "My Wellness Center" states [19] (18 Aug 2026) that open communication, finding a support network, and attending therapy regularly can help; e shots Egg retrieval Implantation, etc. Involuntary childlessness is more common than most people realize. About 4% of couples are involuntarily childless, which equals about 2.5 million couples throughout the United States.

Involuntary childlessness is often an emotionally devastating ordeal, especially while the couple holds out hope to have their own children (instead of fostering a child or choosing adoption).

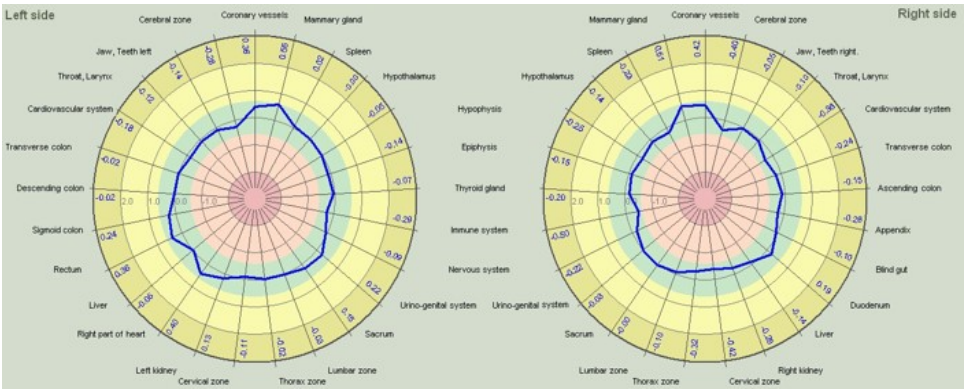

Figure 2: Diagnostic chart of AB, who has undergone Health-promotion regularly using CDM, for a few months

Each year, millions of couples struggle with infertility and getting pregnant, but that doesn't make coping with involuntary childlessness any easier. However, open communication, finding a support network, and attending therapy regularly can help.

Approximately 3.6 million babies are born in the US every year, according to the CDC. That's nearly 10,000 babies every single day! Sadly, the miracle of birth is a far-off fantasy for many couples around the country. No matter how hard they try to get pregnant, nothing seems to work.

In view of both the above spiritual and non-spiritual methods, the Comprehensive Digital medicine (CDM) provides a more scientific and positive solution. Because, the GDV whole-body diagnostic device gives one disease-level number for each of the left and right Urino-Genital system of human body for each of husband and wife. Their CDM dose generated for each of them should be consumed by the concerned persons for a couple of months, and then one more set of tests should be conducted for each of them. If for both of them sufficient reduction of disease-level numbers take place, then they can go ahead for conception of a baby.

When the disease-level numbers are high, nature prevents childbirth, so that stunted or inhibited childbirth, or miscarriage will not take place.

For example, these disease-level numbers of left and right Urino-Genital system, can be seen in Figs. 1 and 2 above as follows: Before medication - 0.81 (Left side), 0.70 (Right side); After medication - 0.22 (Left side), -0.03 (Right side).

Discussion

Comprehensive Digital Medicine is useful for health promotion by curing diseases of not only the various organs, but also the Immune, Nervous and Endocrine systems, even at the bud stage, for the entire humankind. Hence, for persons who are regularly taking Comprehensive Digital medicine starting from childhood (say, from the age of five years), will have their all organs and systems so perfected that their bodies are unlikely to grow tumors.

In view of the great efficacy of Comprehensive Digital medicine or Digital Homeopathy, when the condition of near zero disease-levels in various organs and the Immune, Nervous and Endocrine systems, of human body, is achieved, about 20 years age-reduction is felt, physical and mental stamina improves, with increase in longevity.

Health promotion methodology utilizing an optimal combination (as explained below) of the side-effect free preventive and curative medicines of Comprehensive Digital medicine and Evolved homeopathy, is very useful for any person to achieve and maintain near zero disease-levels in the various organs and systems. Alternatively, if for all persons Comprehensive Digital medicine is generated daily, then it will be too costly, tedious, time-consuming, and hence impractical, and not necessary.

If any person is able to maintain a totally tension-free lifestyle then that person will be able to avoid preventive medicines of Evolved homeopathy and continue with only monthly or bi-monthly generation of Comprehensive Digital medicine and its regular consumption. But, it is impossible to maintain a totally tension-free lifestyle in today's world, due to the COVID era, and particularly due to the structure of human mind.

It is noteworthy to mention that 90% of human mind is the subconscious mind (which never sleeps unlike the conscious mind), whereas, 10% of human mind is the conscious mind [20]. So, any tension (viz., anxiety, irritability and anger, etc.) that occurs in our conscious mind keeps repeating day and night in our subconscious mind without our conscious awareness, and continues accumulating its harmful effects, and generating toxins. As explained in a previously published paper [1], the effect of a mild episode of anger caused Angina Pectoris in a patient's heart, 36 hours after that episode; when based on his primary/ exciting cause, Nux vom. 2x, was given, it eliminated the pain, and stopped progression of Angina. Generation of Comprehensive Digital medicine about a month ago, cannot take care of the effect of such newly generated and amplified (in the subconscious mind) mental symptoms; whereas, the preventive daily doses of Evolved homeopathy can Nip them in the Bud stage. Fig. 2 of that paper showed a small peak for the Angina disease level (0.07, as he was under Comprehensive Digital medicine treatment scheme for quite some time) in the cardiovascular system.

Hence, the regular preventive doses of Evolved homeopathy are useful along with the regular dose of Comprehensive Digital medicine or Digital Homeopathy medicine, for persons who are not able to maintain a tension-free lifestyle.

In 2020, global spending on health reached US$ 9 trillion, or 10.8% of global gross domestic product (GDP) [19]. Even if a fraction of it is spent for the 8 billion people of the world for providing the side-effect free Comprehensive Digital Medicine for all under the auspices of UN, WHO and World Bank/ IMF, etc., diseases can be avoided, and longer living healthy people can increase the GDP further. It is expected that in a span of a few years, global GDP can increase by 5% over a year (in contrast with the present rate of 3% [20] over a year.), due to the improvement of physical and mental stamina of the people, and because people will work for more number of years before retirement. But, the largest counter force against such achievement will be the lack of health-consciousness among vast majority of the humankind.

Hence, the global organizations will have to work coherently; and, even the insurance companies will have to join this effort by reducing the insurance premiums, for those persons who are covered by such Comprehensive Digital medicine prevention scheme.

To begin with the Comprehensive Digital medicine prevention schemes, the global organizations will have to provide for the first few years (after that it will get funded from a part of the increase in global GDP) fund and offer suitable incentives (may be, appropriate annual cash incentives after remaining under coverage of Comprehensive Digital medicine prevention scheme), since vast majority of the apparently healthy part of humankind (whose GDV Diagnostic chart will be like that of Fig. 1 above of AB, whose immune system disease levels are at 0.83 and 0.79) believe that they're healthy, as they are not perceiving any symptom, although all of their organs are having a disease level between 0.8 to 1.0 (like that of Fig. 1 above of AB), and such disease level in immune system cannot prevent tumors/ cancer and many other severe diseases.

Gain of the humankind covered by such Comprehensive Digital medicine prevention schemes, will be a healthy, happier, optimistic, and longer life as well as higher earnings during their working life; additionally, they will be able to prevent occurrence of tumor and cancer, in their bodies.

Any interested computer-literate person anywhere in the world, can utilize this simple to use but sophisticated GDV diagnostic device for generating Comprehensive Digital medicine for anybody, by feeding an electromagnetic-signal from this device to the medicine-preparation-device, involving very low cost.

One YouTube Video titled "Comprehensive Digital Medicine", which is a "Talk on Comprehensive Digital Medicine (CDM) that Leads to Health Promotion (up to 20 years Age-reduction) by Perfectly Curing Diseases of Various Organs, as well as of Immune, Endocrine and Nervous Systems, of Human body, and has Potential to Lead to Health Promotion of Humankind and Rapid Economic Growth of the World" — has been presented in a VIRTUAL International Conference on "Infectious Diseases: Research on Diagnosis and Therapeutics" (https://www.youtube.com/watch?v=oSnx4p81dUw).

Conclusion

In view of the above, it can be said that Comprehensive Digital Medicine leads to health promotion by curing diseases of not only the various organs, but also the Immune, Nervous and Endocrine systems, upto the bud stage. Hence, for persons who are regularly taking the comprehensive Digital medicine starting from childhood (say, from the age of five years), will have their all organs and systems so perfected that their bodies are unlikely to grow tumors.

It is important to mention that doses of these medicines should always be taken, keeping 20 minutes gap (from any consumption of food or drinks), before and after the medicine doses.

Health promotion methodology of side-effect free Comprehensive Digital Medicine is very beneficial for any person. When the condition of near zero disease-levels in various organs and the Immune, Endocrine and Nervous systems, of human body, is achieved, about 20 years age-reduction is felt, physical and mental stamina improves, with increase in longevity.
